PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 2+ years of experience building scalable SaaS applications using React.js, Next.js, and TypeScript. Proven expertise in delivering high-performance, SEO-optimized, and production-grade web applications. Strong background in Core Web Vitals optimization, SSR, state management, and API efficiency. Demonstrated success in improving Lighthouse scores, reducing bundle size, and enhancing user experience in Agile environments.

CORE SKILLS & EXPERTISE

React.js • Next.js • JavaScript (ES6+) • TypeScript • HTML5 • CSS3 • Tailwind CSS • Redux Toolkit • Zustand • React Query • Context API • REST APIs • Axios • Fetch API • JWT Authentication • Role-Based Access Control (RBAC) • Core Web Vitals • SEO Optimization • Server-Side Rendering (SSR) • Lazy Loading • Code Splitting • Memoization • Git • GitHub • GitHub Actions • CI/CD • Postman • Chrome DevTools • Responsive Design • Cross-Browser Compatibility • Component-Based Architecture • Debugging • Production Support

PROFESSIONAL EXPERIENCE

Frontend Developer

Oct 2024 – Apr 2026

Thinsil Technology Pvt Ltd (SaaS Product Company)

- Architected and scaled a SaaS platform handling 3K–5K concurrent users with stable frontend performance
- Developed responsive and accessible UI using React.js, increasing user engagement by 20%
- Reduced bundle size from 1.2MB to 750KB using code splitting and lazy loading
- Improved rendering efficiency by 30% using React.memo, useMemo, and useCallback
- Boosted SEO and search visibility through Next.js SSR implementation
- Increased Lighthouse performance scores through advanced optimization techniques
- Reduced API calls from 12 to 5 per session using React Query optimization
- Implemented secure JWT authentication and RBAC authorization
- Standardized reusable component architecture for scalability and maintainability
- Automated deployment pipelines using GitHub Actions (CI/CD)

Frontend Developer (Freelance)

Feb 2024 – Sep 2024

Nuoma Technologies

- Built and deployed a rental platform supporting **1000+ users** with SSR-based architecture
- Improved Lighthouse score from **55 to 85** through SEO and performance enhancements
- Increased application performance by **30%** via image optimization and lazy loading
- Designed reusable UI components ensuring scalability and consistency
- Reduced unnecessary API calls by **40%** using React Query
- Enhanced global state management using **Zustand**

PROJECT

SaaS Analytics Dashboard (Full Stack Project) | [Project Link](#)

- Developed scalable dashboard using **React.js, Node.js, MongoDB**
- Implemented **Role-Based Access Control (RBAC)** for secure multi-user access
- Built interactive KPI dashboards (10+ metrics) using Recharts
- Reduced API calls by **40%** with optimized caching strategies
- Improved application scalability with efficient state management

KEY ACHIEVEMENTS

- Reduced application load time by **40%** through performance optimization
- Improved Lighthouse and SEO performance significantly using SSR strategies
- Engineered scalable SaaS systems supporting thousands of concurrent users
- Reduced redundant API calls by **50%+**, improving responsiveness

EDUCATION

B.E. Computer Science and Engineering

Aug 2019 – Jun 2023

Bangalore College of Engineering and Technology | CGPA: 7.25 / 10

CERTIFICATION

JavaScript – [HackerRank](#) | React.js – [HackerRank](#)
